CAREER OBJECTIVE

A fully committed, capable and confident individual who possesses the required technical skills, abilities, drive and enthusiasm needed for the organizational goal.

AREAS OF EXPERTISE

- Networking
- CyberSecurity (Nessus)
- DevSecOps(Jenkins, Jira, Snyk.io, Kubernetes, Azure DevOps, IAM,)
- Windows Server 2008 -2019
- LLM(Claude, GPT, Gemini)
- Python
- Extensive experience working with Django and Django Rest Framework
- Extensive experience with Django ORM
- System design and Architecture
- Bootstrap
- Docker/Kubernetes
- Ansible
- Virtualization(Virtual Box/VMware)
- Extensive knowledge of Model View Template Design Patterns
- Github
- PostgreSQL/MSSQL
- Test Driven Development using either Pytest or Unit test
- Object Oriented programming (OOP) concepts
- Extensive knowledge in using python libraries such as Requests, NumPy, Folium, SciPy, Matplotlib, and Pandas
- Ability to successfully multi-task and prioritize work.
- Heroku, AWS, Azure, Jenkins, Jira, Agile Methodology
- Extensive knowledge of creating RESTAPI with DRF
- Machine Learning (Regression, Classification, Sentiment Analysis)
- MSSQL management
- Customer Support Skills

WORK EXPERIENCE

Python Developer/DevSecOps

FSCL Management Consultancy, UK

July 2022- Till date

Python Development:

- Design, develop, test, and deploy high-quality Python applications and scripts.
- Collaborate with cross-functional teams to analyze requirements and design innovative solutions.
- Ensure code quality, readability, and maintainability through code reviews and best practices.

DevSecOps Integration:

- Implement DevSecOps practices, emphasizing security throughout the software development life cycle.
- Integrate security tools and automated tests into the CI/CD pipeline to identify and remediate vulnerabilities early in the development process.
- Work closely with security teams to implement security policies, compliance, and best practices into the development workflow.

Containerization and Orchestration:

- Experience with containerization technologies (Docker) and orchestration tools (Kubernetes) to build scalable and portable applications.
- Implement security measures for containerized applications and micro-services architectures.

Continuous Monitoring and Incident Response:

- Implement continuous monitoring solutions to detect and respond to security threats in real-time.
- Develop incident response plans and actively participate in security incident response activities.

Python Developer//IT Support Officer

VesselNet Integrated Services

November 2021-May 2022

- Develop attendance app to save company cost on third party apps.
- Manage Odoo ERP Platform and customizations with Python.

- Build dashboard for monitoring Growatt Inverters. Integration with Growatt API
- Perform Vulnerability Penetration Test on Company assets.
- Use **Django REST** framework and integrate new API's endpoints for mobile.
- Handle Network infrastructure/VOIP
- Manage Office365, Ensure daily backup of servers
- Manage and maintain all IT Vendors.Recommendation on IT purchase
- Monitor and review SLA's of company ISP to ensure all agreements are met as in contract
- Use Django models to create tables and synchronizing it with PostgreSQL database.
- Use Celery for back-end tasks
- Successful migration from IONOS to Office365
- Managed successful Network infrastructure with very minimal downtime

Technologies Used:

- Redis
- Django/Django Rest Framework
- Celery
- PostgreSQL
- PayStack API
- Bootcamp
- Office365
- Microsoft Azure

Python Developer

NoMugu

July 2020 – November 2021

- Utilize Python, Django to create NoMugu marketplace.
- Manage continuous maintenance and troubleshooting of Python Django projects.
- Perform research to explore and identify new technological platforms.
- Use **Django REST** framework and integrated new API's endpoints for mobile.
- Develop and handle business logic through backend Python code
- Manage and maintain all IT Vendors.Recommendation on IT purchase
- Monitor and review SLA's of company ISP to ensure all agreements are met as in contract.
- Use Django models to create tables and synchronizing it with PostgreSQL database.
- Use Celery for back end tasks

Technologies Used:

- Redis
- Docker
- Django/Django Rest Framework
- Celery
- PostgreSQL

- Cloudinary
- AWS / Appliku
- Paystack API (One-time payment)
- Monnify API (For Customer Reserved Account)
- Mono API (For Statement of Account/Transactions)

TECHNICAL SUPPORT ENGINEER (www.sdsd.com)

SDSD

April 2017-August2018

- Maintenance of servers and network in Nigeria Office
- Network design for full functionality of our software
- Direct support on maritime software/email client
